## Test your knowledge on spreadsheet basics

Total points 3

1. In a spreadsheet, what is text wrapping used for?

1 / 1 point

- ☐ To remove text that is too long to fit in a cell
- ☐ To allow text to overflow into an adjacent cell
- ☒ To allow all of the text to fit inside a cell
- ☐ To clip text within a cell so it doesn't overflow into an adjacent cell

✔ **Correct**

In a spreadsheet, text wrapping is used to allow all of the text to fit inside a cell.

2. The columns in a spreadsheet are ordered by letter, and the rows are ordered by number.

1 / 1 point

- ☒ True
- ☐ False

✔ **Correct**

In a spreadsheet, columns are ordered by letter and rows are ordered by number.

3. Fill in the blank: In a data table, a row is called an observation. An observation includes all of the \_\_\_\_ for what is contained in the row.

1 / 1 point

- ☐ commonalities
- ☒ attributes
- ☐ diagnostics
- ☐ names

✔ **Correct**

In a data table, a row is called an observation. An observation includes all of the attributes for what is contained in the row. An attribute is a quality or characteristic of data.
